

Incident Report – Email Gateway: Malicious Attachments ([Ticket #CS-0244](#))

1) Incident Details

- **Timestamp:** 2024-05-26 19:46:23-07:00
- **Sender:** "Accounts" info@chartardaccountgroup.com
- **Recipient:** arun.gupta@cybersecxperts.com
- **Email Subject:** *Pending payment*
- **Sender IP:** 172.67.178.105
- **Status:** Delivered
- **Action:** Allowed
- **Reason:** NA

2) Incident Summary

A phishing email was received by **two users (Arun Gupta & David Lee)** with a suspicious attachment named **Doc#0513700158xls.7z**. The attachment hash was flagged by multiple vendors as a **Trojan (Lumma Stealer / Trojan.MSIL.Lumma)**.

Although the email bypassed the **Email Gateway** and was delivered, **no users opened or executed the attachment**, so no compromise occurred.

This incident is confirmed as a **True Positive phishing attempt**.

3) User Details

- **Username:** Arun Gupta
- **Designation:** Accounting Manager
- **Hostname:** ENDP-042

Other targeted user: **David Lee** (Finance Team)

4) Source IP Analysis – 172.67.178.105

- **Reported:** 1 time
- **Confidence of Abuse:** 0%
- **ISP:** Cloudflare
- **Country:** USA
- **City:** San Francisco, California

5) Log Analysis

a) Email Log Analysis

- **Events observed:** 2 (both allowed & delivered)
- **Sender:** info@chartardaccountgroup.com
- **Recipients:**
 - david.lee@cybersecxperts.com
 - arun.gupta@cybersecxperts.com
- **Attachment:** Doc#0513700158.xls.7z
- **Status:** Delivered

Attachment_Hash	Attachment_Name	Email_Subject	MessageID	Recipient	Status
ad452771a6e039f2d06bd873f4705705	Doc#0513700158.xls.7z	Pending payment	20240526194622.687742A3F2FD034F@chartardaccountgroup.com	david.lee@cybersecxperts.com	Delivered
ad452771a6e039f2d06bd873f4705705	Doc#0513700158.xls.7z	Pending payment	20240526194622.687742A3F2FD034F@chartardaccountgroup.com	arun.gupta@cybersecxperts.com	Delivered

b) Attachment / Hash Analysis

- **File Name:** Doc#0513700158xls.7z
- **Hash:**
d9f6e61cf394dd0cb81ec6dd60e16050cd202a3fbe5f7be39435b1b942e511f2
- **Security Vendor Verdicts:**
 - 50/72 vendors flagged as **Malicious**
 - Common detection name: **Trojan.MSIL/Lumma Stealer**
- **Behavior:** Lumma Stealer is an **infostealer trojan** known to exfiltrate:
 - Saved browser credentials
 - Cryptocurrency wallets
 - System information

6) IOC Scoping

Splunk Search:

index=main "Doc#0513700158xls.7z"

- IOC found in **2 email events only**.
- No evidence of file execution or user interaction.
- **No lateral movement or endpoint compromise observed.**

7) Action Taken

- **EDR Team:** Blocked attachment hash (ad452771a6e039f2d06bd873f4705705) across all endpoints.
- **Email Security Team:** Blocked sender email info@chartardaccountgroup.com and domain **chartardaccountgroup.com** at the Email Gateway.

- **Awareness:** Notified targeted users to avoid opening similar attachments.
- **Monitoring:** Added domain & hash to IOC watchlist for further detection.

8) Conclusion

- **Classification:** True Positive – Phishing with Malicious Attachment (Trojan.MSIL/Lumma)
- **Impact:**
 - No execution observed.
 - No systems compromised.
- **Mitigation:** File hash & domain blocked, user awareness reinforced.
- **Final Status:** Contained – Ticket Closed
